## PORCH ENCLOSURE SYSTEMS

# JUST RELAX...

and imagine the feeling of kicking back and enjoying your favorite outdoor space from inside your perfectly enclosed patio, free from insects and impervious to weather.

Prior to adding porch panels, this space was susceptible to insects and wildlife.

Our porch enclosure system in forest green frame blends perfectly for a seamless look.

# TOTAL TRANSFORMATION

Porch Enclosure Systems by SummerSpace® are a perfect way to add comfort to any covered porch or patio. Insects can't penetrate our extra strength polyester screening, which is just dark enough to give a hint of privacy. These systems are a must-have on any porch, veranda or patio area.

# PORCH & PATIO

The beauty of **Porch Enclosure Systems by SummerSpace®** is that they conform to any space. Custom made to fit almost any size porch opening, these systems consist of panels made with powder coated aluminum framing, tempered glass, and durable screen. Designed to be as functional, compact and strong as possible, we've engineered significant performance into a slender panel design for a weatherproof room that will endure for years. Panels connect securely for a quick and efficient installation.

SummerSpace Porch Enclosures allow you to turn your open porch into a retreat that's free of insects, with a perfect hint of privacy that comes from our extra strength polyester screening. Use your porch as a bug free screen room in summer months. As the weather or seasons change, slide your tempered glass windows closed for a weatherproof room that can be enjoyed during cooler times of the year.

PANELS WITH MAIN GLASS SLIDERS AND 36" TEMPERED GLASS BASE

PORCH BEFORE PANEL INSTALLATION

These panels made a dramatic difference on this porch, turning it into living space that can be enjoyed all year. The sliding panes can be removed easily for a screen room in warmer months.

SCREEN ONLY UPPER PANELS WITH MAIN TEMPERED GLASS SLIDERS REMOVED

# PORCH ENCLOSURES ARE A

# SMART INVESTMENT

Porch enclosure panels offer a range of benefits for homeowners. One of the main advantages is their quick installation time, with most projects taking less than a day to complete. These panels are also custom-sized, ensuring a perfect fit for any porch or patio. Additionally, they require no additional finish under normal circumstances.

By enclosing a porch, homeowners can quickly gain additional living space that is both functional and aesthetically pleasing. Furthermore, this upgrade adds value to a home at a fraction of the cost of a four-season room. Finally, porch enclosure panels provide flexibility, allowing homeowners to adapt to various weather conditions by easily sliding or removing the tempered glass and screens.

DURING INSTALLATION

## SUMMERSHIELD™

All powder coatings and applications are not created equal. Our industry leading pretreatment, and proprietary SummerShield powder coating finish, exceeds AAMA 2604 specifications including 3,000 hour salt spray testing. This super durable finish includes UV inhibitors that extend the life of the beautiful, fade resistant finish. Choose from thirteen low gloss, lightly textured finishes. SummerShield takes it one step further by infusing our coatings with anti-microbial technology for the ultimate in low maintenance finishes.

**1**  
**TOP VENT SLIDERS**  
Optional top vent tempered glass slider windows allow you to control room air ventilation.

**2**  
**SLENDER DESIGN**  
Durable components allow for a thin overall panel depth of 2½".

**3**  
**CUSTOM CONTROL**  
The handles on our window panes slide up and down effortlessly for personalized functionality.

**4**  
**INSECT CONTROL**  
Our panels are made with an incredibly durable mesh screen to keep insects out. No-see-um screening also available.

**5**  
**TEMPERED SAFETY GLASS**  
Our 4mm i89 Low-E Tempered Safety Glass is high performance with clear appearance & high light transmission.

## PANEL STYLE SELECTION GUIDE

### CUSTOM WINDOW PANELS WITH TEMPERED GLASS in 1/8" increments

Window panels have a 27" minimum width and a 96" maximum width.

Width:  
10"-36" (fixed glass)  
14"-36" (screen only)  
14"-36" (screen with lift-out glass panels)

**W3**  
Sliding window panel with transom and base

Overall window panel heights including transom and base up to 120"  
Details about individual section parameters can be found under the pictures to the right.

**WF3**  
Narrow Matching Window Panels

Includes matching horizontal dividers with glass, aluminum or screen.

**W2T**  
Sliding window panel with transom  
Overall window panel heights including transom up to 108"  
Transom height with fixed glass or aluminum 10" to 36"  
Transom height with sliding glass 14" to 36"

**WF2T**

**W1M**  
Main sliding window panel only  
Min. height: 15" / Max. height: 72"

**WF1**

**W2B**  
Sliding glass window and base  
Overall window panel heights including base up to 108"  
Base height with fixed glass or aluminum 12" to 36"  
Base height with sliding glass 14" to 36"

**WF2B**

As a reference the panel shown above has an 18" base, a 66" window, and a 14" sliding glass transom. The use of a sliding glass transom is not recommended if the total height of the opening is less than 94", as it may interfere with your view.

When using a transom, it is recommended that it be used above all panels including the door(s) so the aesthetic appearance stays consistent and clean.

All sliding glass openings include a screen with standard mesh. No-see-um screening is available for a small additional cost.

Base section available with fixed glass, aluminum or sliding glass with screen.

All window panels are available as a screen only panel.

**Note:** Panels that exceed 88" in both height and width will require the product to be shipped with a simple frame splice kit. The process of rejoining the two sections is extremely easy and takes only a few minutes. Large panels that exceed 88" in both height and width are available without a splice using alternative shipping methods; Ask for details.

DOOR STYLE SELECTION GUIDE

CUSTOM DOORS WITH TEMPERED GLASS *in 1/8" increments*

Double Door Range		60" to 106" in 1/8" increments				
EXAMPLES	Overall Door Width	60"	72"	84"	96"	106"
	Net Opening Width for Sliding Door	24"	30"	36"	42"	47"

Net opening with all doors removed is 5" less than the overall door width.

To calculate the approximate net opening with all doors in place, take the overall door width including the frame, divide by 2, minus 6".

**D2**  
Sliding patio door with glass and screen  
Widths from 60" to 106" | Door heights from 78" to 88"  
Our 106" extra wide door is hot tub accessible

Sliding doors requiring a solid transom are available only with fixed aluminum. Because the door frames are shipped unassembled, we are unable to ship unframed pieces of glass. If glass is preferred, we recommend finding a local glass company that can supply and install it for you. The aluminum can be easily removed and used as a template. The glass thickness is 4mm or 1/2".

**D2T**  
Sliding patio door with transom  
Widths from 60" to 106" | Door heights from 78" to 88"  
Overall door heights including Transom up to 120"  
Transom height with fixed aluminum 10 1/8" to 36"  
Transom height with sliding glass 14 1/8" to 36"

Triple Door Range		96" to 124" in 1/8" increments		
EXAMPLES	Overall Door Width	96"	106"	124"
	Net Opening Width for Sliding Door	27.5"	30"	36"

Net opening with all doors removed is 5" less than the overall door width.

To calculate the approximate net opening with all doors in place, take the overall panel width including the frame, divide by 3, minus 6".

**D3**  
Triple panel center sliding patio door with glass and screen  
Widths from 96" to 124" | Door heights from 78" to 88"

**D3T**  
Triple panel center sliding patio door with glass, screen & transom  
Widths from 96" to 124" | Door heights from 78" to 88"  
Overall door heights including Transom up to 120"  
Transom height with fixed aluminum 10 1/8" to 36"  
Transom height with sliding glass 14 1/8" to 36"

**Notes:**

- Doors with glass include sliding and stationary glass panels and one sliding screen door.
- Doors ordered with screen only include stationary screen panels and one sliding screen door.
- Screen only doors from 78" to 92", transom height 14 1/8" to 36".
- All screens include standard mesh. No-see-um screening is available for a small additional cost.

# PORCH & PATIO

## EXTRUDED ALUMINUM

Aluminum is a versatile, stable building material used in many architectural, industrial, and building product applications because of its strength and durability. Aluminum is uniform in quality when extruded and will never rust. It is affordable, corrosion-resistant, and extremely strong, providing a great surface to powder coat for a lasting outdoor finish. Aluminum is also low maintenance, recyclable, and unlike roll-formed shaped products, aluminum extrusion is structurally stable. These are some of the many aspects of SummerSpace Porch Enclosure Systems that assure its long-lasting durability.

## COLOR MATCHED TRIM

Our two-piece aluminum powder coated trim is a seamless way to add that finishing touch. Available in two sizes, our narrow width is 1 3/8" to cover gaps up to 3/4" and a wider 1 7/8" to cover gaps up to 1 1/4". This unique two-part trim design attaches easily to the panel with an easy snap on cap to hide the screws. With a beautiful panel-matching low gloss finish, this trim can be used inside, outside, or both. Our custom-matched silicone sealant is the perfect way to get a waterproof seal with a finishing touch. Touch-up paint bottles with mini brush or slim touch-up pens are also available for that occasional scratch or nick.

## SILICONE SEALANT

**Our silicone is made to match your frame!**

*We recommend one tube of color-matched sealant for every one to two panels.*

Perfect  
Our color matched sealants and touch-up

## EASY TO REMOVE SASHES

For the days when the air is warm and the breeze is refreshing, you may want to simply have a screen enclosure for your porch. SummerSpace window panes are easy to remove and reinsert with minimal effort, allowing you to customize your comfort as the weather changes. To remove your panes, simply lift upward and slide out from the bottom. To reinsert, lift upward so the pane slides into the groove and allow it to slide down into place.

## FLEXSCREEN®

SummerSpace® Porch Enclosure Systems are made exclusively with FlexScreen®. Created using flexible spring steel coated in exterior-grade PVC, the FlexScreen frame is nearly indestructible, scratch-resistant, and impervious to weather extremes. Held firmly in place by tension, the frame disappears into the screen pocket for an unobstructed view. And FlexScreen installs and removes in seconds for easy cleaning. We're proud to offer this premium, hassle-free product on our popular SummerSpace® Porch Enclosure Systems!

## TOUCH-UP PAINT

detail.

paints give a seamless finishing touch!

**Available in  
all frame colors!**

*We recommend one bottle or pen  
of touch-up paint per project.*
